SUMMARY

Motivated and responsible Computer Science student with a strong foundation in fullstack development. Skilled in both front-end and back-end technologies, with hands-on experience in designing, developing, and deploying web applications. Adept at using modern software tools and frameworks to solve complex problems efficiently. Eager to contribute technical expertise, time management, and a passion for continuous learning to dynamic development teams.

PROFESSIONAL EXPERIENCE

Web Development Intern, EY Global Delivery Services & AICTE

Feb 2025 - Mar 2025

- Completed a 6-week internship focused on building fullstack web applications using the MERN stack.
- Developed and deployed applications with CRUD operations, RESTful APIs, and responsive UIs.
- Implemented JWT-based authentication, dynamic routing, and state management with React Router and Axios.
- Gained hands-on experience in frontend-backend integration, component-based design, and database interactions.
- Collaborated in a remote setup using Git, GitHub, and VS Code for version control and team coordination.

Android App Development Intern, CodSoft

Jan 2024 - Feb 2024

- Developed Android apps including a calculator, flashlight, and a medicine reminder app with notifications.
- Built responsive and user-friendly interfaces using XML and followed material design principles.
- Utilized Java and Kotlin to develop features and integrate REST APIs for dynamic content.
- Gained experience in debugging, testing, and deploying applications using Android Studio.
- Strengthened understanding of app lifecycle, background processes, and UI responsiveness.

SKILLS

- Programming Languages: Java, Python, C
- Libraries / Frameworks: HTML, CSS, JavaScript, React.js, Node.js, Express.js, Flask, jQuery, Bootstrap
- Databases: MySQL, MongoDB, Oracle
- Tools / Platforms: Visual Studio Code, Git, GitHub, Postman, XAMPP, Android Studio

SOFT SKILLS

- | | | |
|-------------------|---------------------|-------------------|
| • Teamwork | • Leadership | • Decision-Making |
| • Communication | • Critical Thinking | • Responsibility |
| • Problem-Solving | • Collaboration | • Multitasking |

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

2022 - 2026

Rajalakshmi Engineering College (Autonomous) - CGPA : 8.26/10.0

Higher Secondary Education

2020 - 2022

Mount Park Higher Secondary School - 93.33%

PROJECTS

AI-Enabled Personal Expense Manager

- Designed and developed a fullstack web application for intelligent personal expense tracking and management.
- Implemented secure user authentication and authorization using JWT and role-based access control.
- Created a responsive React.js frontend integrated with a RESTful Node.js/Express.js backend.
- Integrated Tesseract.js to extract data from uploaded bills using OCR and auto-populate form fields.
- Visualized expense data using Chart.js with category-wise and monthly analytics.
- Enabled dynamic filtering and export of reports as downloadable PDFs using jsPDF and html2canvas.
- Utilized MongoDB for database management and Multer for file handling in backend APIs.
- Ensured seamless communication between frontend and backend using Axios for HTTP requests.
- **Technologies:** React.js, Node.js, Express.js, MongoDB, JWT, Tesseract.js, Chart.js, jsPDF, html2canvas, Multer, Axios

Analyst Recommendation System

- Designed and developed a fullstack web application to recommend analysts for projects based on expertise, past performance, and task requirements.
- Built a dynamic front-end interface using HTML/CSS and integrated it with a Flask-based backend to deliver real-time analyst recommendations.
- Integrated machine learning models into the backend using Scikit-learn to process and evaluate multi-dimensional data.
- Developed RESTful APIs to manage user input, system responses, and analyst-task assignment workflows.
- Implemented SQL database structures to store analyst profiles, project data, and performance metrics.
- Enabled real-time, multi-user access and streamlined analyst allocation through automation and interactive dashboards.
- **Technologies:** Python, Flask, Scikit-learn, Pandas, SQL, HTML, CSS, JavaScript

Trash to Treasure

- Built a MERN-based web application enabling the exchange of reusable waste between sellers (industries) and buyers (recyclers).
- Implemented role-based authentication with secure login using bcrypt.js and personalized dashboards via local storage.
- Developed seller dashboards to submit waste requests and buyer dashboards to manage, accept, or reject requests.
- Designed a responsive, pastel-themed UI with animated components to enhance user experience.
- Created RESTful APIs for user management and request handling, integrated with a MySQL database for persistent storage.
- **Technologies:** MongoDB, Express.js, React.js, Node.js, MySQL, Axios, bcrypt.js, React Router, CSS3

ADDITIONAL INFORMATION

- **Languages:** English, Tamil.
- **Certifications:** FullStack Web Development - InternEzy; Joy of computing using PYTHON - NPTEL; AI Infrastructure and Operations Fundamentals - NVIDIA.; JavaScript for Web Designers - LinkedIn Learning.
- **Achievements:** Invited as a Guest Speaker on Machine Learning for a workshop organized by the DEVS Club.; Secured a Top 5 position in Project & Paper Presentation at the Datatrix Symposium, SRM Institute of Science and Technology, Ramapuram.; Finalist in a 24-hour Hackathon for the project TerraDefender, conducted by St. Joseph's College of Engineering.
- **Volunteering:** Event Volunteer, IEEE CS Inter-College 36-Hour Hackathon "Xyntra'25"; NSS Volunteer, Beach Cleanup Drive
